PROFESSIONAL SUMMARY

Detail-oriented Information Technology student with a strong foundation in full-stack web development, game development, and AI integration. Passionate about leveraging emerging technologies to design and develop innovative, user-centered solutions. Demonstrates effective collaboration skills, contributing productively within cross-functional teams to deliver high-quality projects on time.

PROJECTS

AgapAI

January 2026 – Present

Full-Stack Developer

- Developed a comprehensive mobile and web platform focused on emergency rescue, proactive health monitoring, and community engagement for senior citizens in Valenzuela City
- Architected a dynamic frontend and real-time backend using React, Firebase, and Google Generative AI to handle multi-tiered role access, live SOS dispatching, and automated medication tracking
- Integrated Google Generative AI with a React and Firebase tech stack to build a conversational assistant capable of processing Taglish commands, managing schedules, and proactively analyzing medication adherence
- Developed a centralized health and rescue management system connecting Senior Citizens, Family Guardians, and Local Government Units (City & Barangay Admins)

PNP Internship Database Tracking Management System

July 2026

Full-Stack Developer

- Developed a role-aware platform centralizing internship attendance, daily time records, documents, evaluations, projects, announcements, and staff workflows
- Architected a responsive frontend and backend using React, Vite, Express, Supabase, JWT authentication, and protected file access
- Implemented QR-based attendance, face verification, signed URLs, and database-level authorization for administrators, supervisors, and interns
- Built a centralized operational workspace designed to support the complete internship administration process
- Engineered an automated continuous integration and continuous deployment (CI/CD) pipeline utilizing Vercel, ensuring high website availability and rapid delivery of feature updates

PAIS 2.0

August 2026

Full-Stack Developer

- Developed an enterprise personnel and assignment management platform for PNP uniformed and civilian personnel
- Built responsive administrative workflows using React, TypeScript, Tailwind CSS, Express, and Supabase
- Implemented structured interfaces for personnel records, assignments, and internal administrative processes

CAMP-NAVI

August 2026

Full-Stack Developer

- Developed a geofencing and navigation system for Camp Crame to improve security operations and campus movement awareness
- Designed an operational view for monitoring checkpoints, perimeter areas, and important campus locations
- Translated real-world security and navigation requirements into a centralized digital platform

Foliofy

June 2026

Full-Stack Developer

- Developed a browser-based Progressive Web Application that transforms image collections into polished Word and PDF documents
- Implemented IndexedDB persistence, drag-and-drop organization, responsive workflows, and client-side document generation
- Integrated docx.js and jsPDF to allow users to customize and export documents directly within the browser

EDUCATION

Pamantasan ng Lungsod ng Valenzuela (PLV)

Expected Graduation: June 2027

Bachelor of Science in Information Technology

Valenzuela City, Philippines

SKILLS

TypeScript; JavaScript; HTML5; CSS3; Java; Python; React.js; React Native; Expo; React Router; Node.js; Express.js; Vite; Tailwind CSS; Progressive Web Apps; Firebase; Supabase; MySQL; PostgreSQL; REST APIs; JWT Authentication; OpenAI API; Google Gemini API; Git; GitHub; Vercel; IndexedDB; docx.js; jsPDF; Networking Protocols; Subnetting; IP Configuration; Responsive Design; Accessibility; Agile Development; Debugging; Analytical Thinking; Problem-Solving
